Dómari		

good size, enough masculine, low to the ground in body prop, wide set big ears, round skull, a little bit too much stop, correct length of muzzle, turn out strongly front feet, correct light bones, needs more forechest and front angulation, I would like to see a little bit more body weight, good rear ang, very happy tail, when he is standing also very narrow in front, dark tan colour, unfortunately the coat texture is not silky enough and a little bit to harsh, needs more parral. front movement, active behaviour
